

Syed S. Hussain is a highly innovative global executive, thought leader, advisor, and serial entrepreneur with an illustrious career spanning over twenty five years at the convergence of technology and finance.

He is currently the Founder & CEO of SHIZA (Shared Human Intellect Zonal Agents), where he is channeling his profound expertise into sculpting the convergence of AI & Web3 to enable a future where human intellect is transformed into sovereign AI agents that are owned and controlled by the individual, enabling them to capture, own and monetize their novel human experience. His approach is characterized by a nuanced understanding of the intricate dance between emerging technologies and the evolving needs of the modern world

Syed's entrepreneurial journey took flight as a senior in high school, where he launched his first company, propelling him through a journey of innovative ventures, consistently breaking new ground. Concurrently, his insights and strategies have fueled data-driven, transformative initiatives within financial titans such as Credit Suisse and Neuberger Berman, placing him at the vanguard of corporate innovation. His recent endeavors include architecting Liquidity Digital's ascent and spearheading BANKEX, a top-tier blockchain titan.

In Syed, you find a rare fusion of innovative entrepreneurship and strategic corporate wisdom that makes him not just an active participant, but a leading architect in building the future of tech.

Syed is also involved in numerous community building efforts, outreach programs, philanthropic activities, and is an avid mixed martial arts enthusiast. He resides in New Jersey with his wife and three children.

### KEY ACCOMPLISHMENTS

- Founded and launched innovative private capital marketplace for traditional and digital assets, while guiding the organization to 700% YoY revenue growth within the first 2 years of operation.
- Pivotal contributor to the Bankex Proof of Asset protocol whitepaper; securing its stature as a top 15 global blockchain behemoth.
- Established industry pioneers such as MovieCoin and MusicCoin and structured one of the first "Security Token Offerings" (STO) in industry being at the forefront of the token economy.
- Bridged gap between traditional and digital assets by establishing partnerships with industry leaders, such as Securitize, Polymath, Genesis Block, Weild & Co., Sterling Equities, Signature Bank, and others.
- Spearheaded the launch of 5 new products including a regulatory compliant digital securities issuance platform, a post-issuance platform enabling automated dividends and a deal recommendation engine, allowing for automated private deal matching via an ML-based DealMatching AI tool.
- Secured asset management division of Lehman Brothers as client (post-Lehman collapse); subsequently brought in full time to head and orchestrate.
- Architected, designed, and delivered a firm-wide global analytics infrastructure and data warehouse for a newly established Neuberger Berman entity resulting in annual cost savings of ~\$4.8M.
- Accountable for global design, developmental, and support of the Credit Suisse global BI program as the Data & Analytics AVP and Chief Evangelist behind a \$8M+ firm wide BI program.
- Successfully launched multiple ventures across a variety of industries with first company launched during the dawn of the internet while still a senior in high school.
